KT GLASS

KT GLASS is the classic top hung sliding frameless glass door system designed by KLEIN for single and by-pass doors for both commercial and residential environment. Pressure clamps are used to hold the panels to avoid any drilling of the glass. A wood or aluminium valance is usually applied to cover the gap between the track and the door. **2 options are offered:**

. **KT Glass** for doors weighting up to 176lbs (80kgs). The system is mainly applied for by-pass doors for closets but also for single sliding door where a more simple solution is required. It is available for 5/16" and 3/8" glass.

. **KT Glass Expert** for heavy duty doors weighting up to 396lbs (180kgs). The system is mainly applied in projects where large and high frameless glass panels are required as the clamps can hold doors up to 10'. It is available for 3/8" and 1/2" glass.

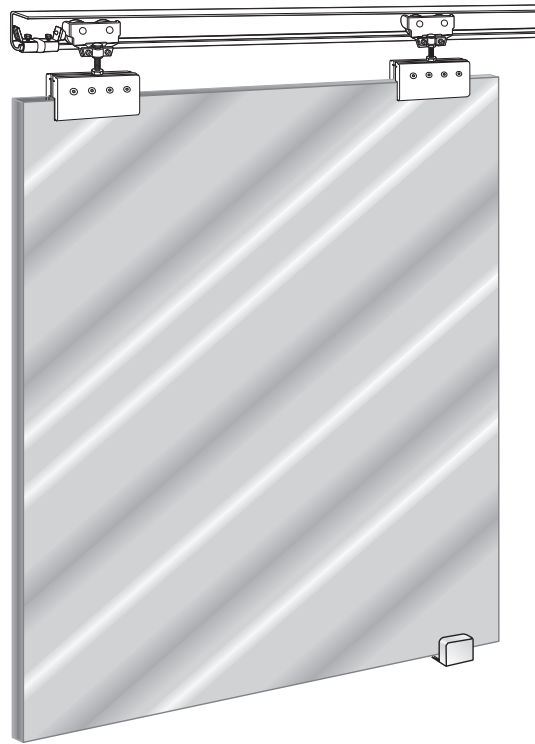

KTGLASS es el sistema corredero de KLEIN, para puertas de vidrio, sin marco, diseñado para una o dos puertas tipo by-pass. Ideal tanto para ambiente comercial, como residencial. Las mordazas a presión permiten suspender las hojas sin necesidad de agujerear el vidrio. Su instalación admite una galería de madera y/o aluminio, para ocultar el mecanismo y perfil. Existen dos opciones disponibles:

. **KT Glass** para puertas de hasta 80kgs (176lbs). Su principal aplicación es en armarios como puertas de by-pass, pero también se instala en gran cantidad de puertas sencillas, donde se requiere una solución más simple. Se puede montar con vidrios de 8mm y de 10mm.

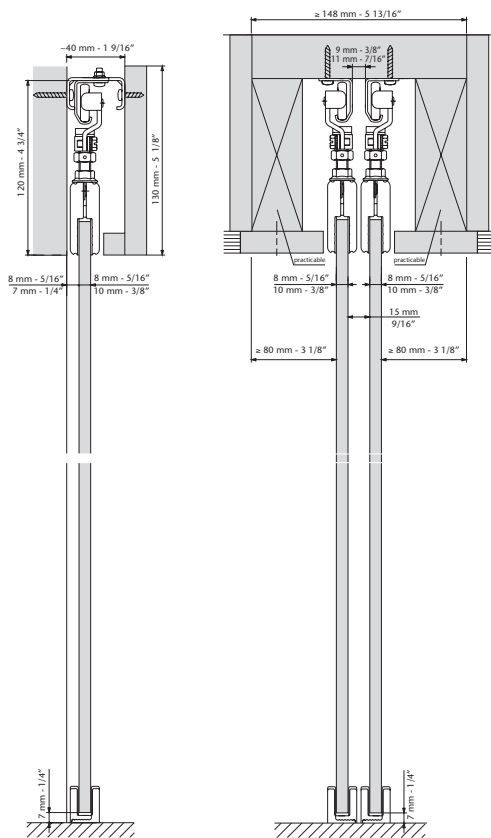

. **KT Glass Expert** para puertas de gran peso -hasta 180kgs (396lbs)-. El sistema está principalmente diseñado para proyectos donde se requieren puertas anchas y altas de hasta 3m (10'). Instalación con vidrios de 10mm y 12mm.
