DORMA MANET

Single-point stainless steel fittings

Because work space today requires open space and light, designers and architects prefer the flexibility that glass partitions and doors provide. The DORMA MANET system offers designers limitless possibilities for creative glass ideas. MANET systems can be designed with either a pivoting or sliding door, simulating open space while still maintaining privacy.

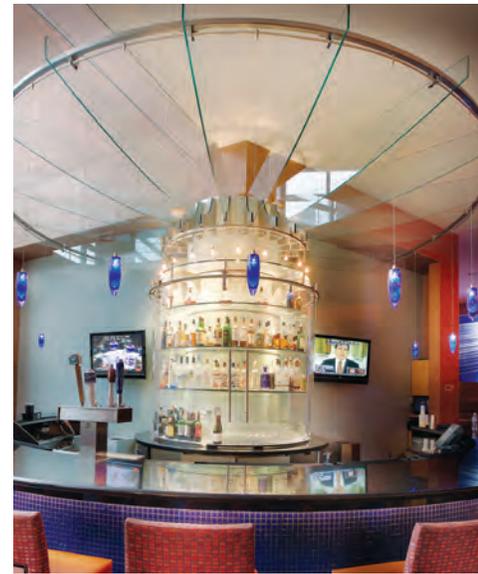

With flush-mount, single point, stainless steel fittings, the uniquely designed MANET hardware provides a streamlined smooth surface. For wet environments, MANET components are available in a 316L stainless steel.

The MANET system accommodates 3/8" (10 mm), 1/2" (12 mm), 5/8" (15 mm), or 3/4" (19 mm) tempered glass, as well as sliding wood panels. MANET Compact sets are readily available and include all the hardware required for the door.

MANET Sliding

- Accepts multiple glass thicknesses.
- Accommodates sidelites and transoms.
- Curved sliding doors available.
- Office opening sizes: See product brochure for technical specification.

MANET Pivoting

- Accepts multiple glass thicknesses.
- Accommodates sidelites and transom.
